

1. Optional: Color in with markers or colored pencils, or cut out of colored paper.
2. Optional: To make more durable, glue sheet to cardboard.
3. Cut out barn and fold on dotted lines.
4. Cut out Mary, Joseph and Baby Jesus.
5. Glue baby Jesus to the front of Mary.
6. Stand for Mary: cut one bigger rectangle and glue ends to form a ring. Fold ring flat, then open, and line up the 2 fold marks and fold flat again. Open into a cube shape. Glue to Mary on the the back, at the bottom. Repeat for Joseph.

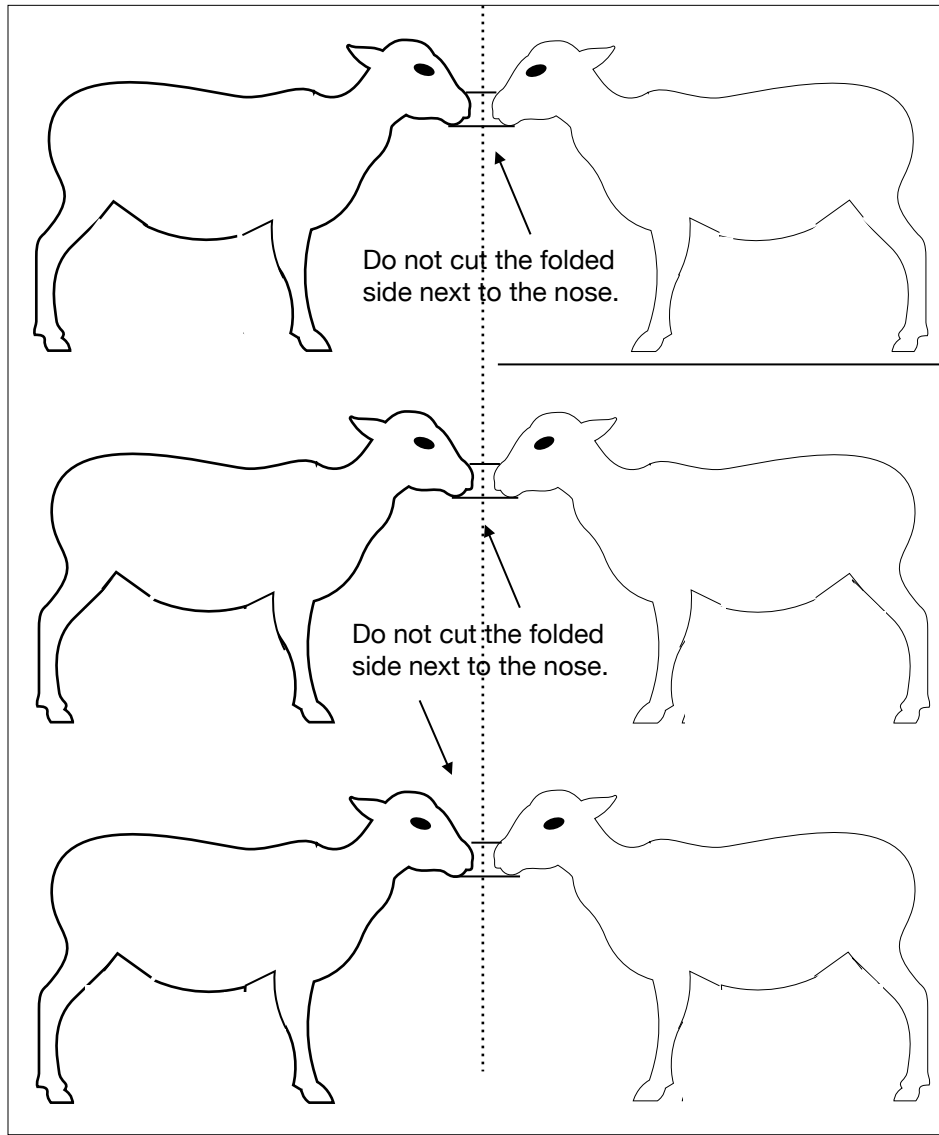

Optional star:  
cut from yellow  
paper and glue  
onto barn

Glue gifts to fronts of wisemen

Stands for wisemen: see instructions on sheet with barn

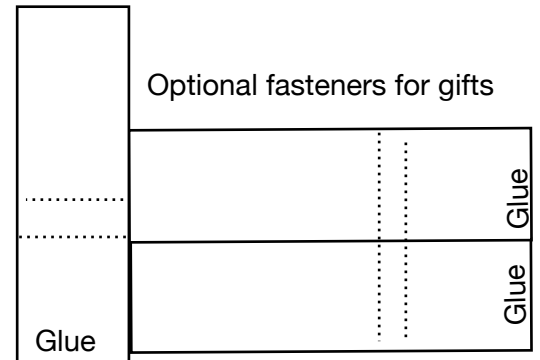

Fold the camel on dotted line, then cut out both sides at the same time. Do not cut the ear and hump—these two points should stay attached on the fold.

Cut one star from yellow paper and glue to night sky **OR** cut out 2 stars and glue to a stand. For example, glue two stars back to back with a bamboo skewer between them, and stick into an eraser (rubber) as a base.

Do not cut the ear and hump apart.

Only use this pattern if using stiff paper such as card stock. If using regular copier paper to make camel, see separate page that has a stand on the page that will help support thin floppy legs.

The smaller angels can be placed so it looks like they are farther away

Optional stands for wisemen: Large rectangles for large angels, and small rectangles for small angels. See instructions on sheet with barn. NOTE: These are not needed if angels are glued to background sky.

Extra stand is for fire to make it stand up.

Print this page on brown paper if you are using colored paper for all of the figures, since those faces will not be skin color.

Angels

## How to make a night sky background

**This background can be used for the shepherd scene, or for the wisemen scene, or to make both night scenes**

1. Cut out mountains and trees,(not on this sheet) and glue onto a black or dark blue sheet of paper to represent a night sky. Optional: use the circle guideline to cut the black paper into an arch. If the black paper is thin paper, glue to cardboard to make it sturdier, so it will stand up.
2. Cut out stand (shape below, on this sheet).
3. Glue the stand to the bottom back of the night sky scene. Adjust the two sides to form a stand to make the background stand up. NOTE: if the background keeps falling over, cut the edges of the stand at a little bit more of an angle.
4. Glue star to night sky for a wisemen scene. Stand up wisemen and camel in front of background.
5. Glue angels to the night sky for the shepherd scene. Stand up shepherds and sheep in front of background

**Make camel with base and reinforced legs if making camel with copier paper. The base is not needed if making the camel with stiff paper such as card stock because it can stand without support.**

Base for camel:

1. Fold on dotted line so the legs on each side line up with the legs on the other side. It should be flat now.
2. Cut out the legs on both sides at the same time.
3. Fold the legs in the opposite direction on dotted line where the feet meet the base.

4. Glue the legs on the base to the inside of the legs of the camel.

**NOTE:**

To make the camel stand, spread the base flat. To put in storage, fold the base on the dotted line.
